

Arch Insurance's Risk Management Newsletter Issue 1

Welcome to Arch Insurance's Risk Management Newsletter, where we provide regular updates on the most pressing risk management issues and solutions.

Read our Technical Talks: Hazardous Substances

According to Health & Safety Executive (HSE), 100 times as many workers die from diseases caused or made worse by their work than are killed in construction accidents.

Asbestos in old buildings remains a problem, with more than 3,500 construction and allied trades workers dying each year from work related cancers.

In this paper, we look at the potential hazards in a manufacturing arena and how businesses can manage their exposure.

Broker Webinar: How Arch Business Protection can help manage supply chain risk for your clients (30 minutes)

Tuesday 5 April at 9.30am

From recent geo-political to health epidemics, business resilience (BC) is becoming instrumental for business success in 2022. We are offering a free webinar to our broker partners to learn how Arch Business Protection provides the resources for your clients to develop an "operational" BC Plan, to overcome supply chain issues.

Our Risk Management Solutions

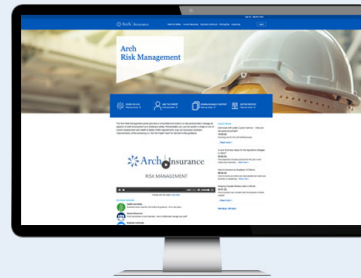

At Arch Insurance, we provided brokers and their policyholders two risk management solutions dependant on policy premium size. Please see below for more details.

Arch Business Protection (ABP) is an online risk management system for eligible Arch commercial policyholders, which combines an online management system, onsite risk consultancy and unlimited remote support by phone, email or webinar to SME businesses. Available to eligible Arch Policyholders. Speak to your local branch to sign up your clients.

Arch Risk Management is an online risk management portal, enabling businesses to effectively manage all aspects of staff employment and workplace safety. Available to eligible Arch Policyholders. Speak to your local branch to sign up your clients.

Kind regards,

Arch Insurance UK Regional Division
