Unlimited Engagement Support

SIGN UP NOW: Book your 121 Engagement meeting to get started 0800 118 2208

ARM Plus delivers a vast range of solutions, so we work in partnership with your insurance broker to help you understand how ARM Plus can help your business. Here's how it works:

STEP 1

121 Engagement Meeting

When you or your broker "signs up" for ARM Plus, we will arrange a 1-2-1 video call with our Engagement Team to understand your issues, needs, and priorities and establish how ARM Plus could assist you.

STEP 2

Your ARM Plus Solution

If you decide to use ARM Plus to deliver value to your business, we'll set up your account and provide individual, tailored implementation guidance to meet your priorities and operational bandwidth.

STEP 3

Deliver & Implement

When you are ready to go, we'll help you set up your company in ARM Plus, as well as the elements you want to start using.

STEP 4

Continuous Support

Our Engagement Team are here to help – whenever you need it. Whether it's everyday queries, refresher training, support when we launch new systems, training for new starters. Just pick up the phone or book an online call.

Enhancing your Health and Safety Management

The ARM Plus cloud-based Health and Safety Management System will allow you to develop, proactively manage and report on Health and Safety.

- Deploy quickly with 75% out-of-the-box flexible risk assessment and checklist builders for control measures and H&S arrangements.
- Complete safety checks, audits, and report hazards and incidents with our mobile or tablet app, even offline.
- Replicate your business structure to allocate H&S activity and track performance.
- Access management information for reporting on performance data based on responsibilities.
- Digitise your safety management systems reducing paper, friction and cost
- Support is on hand whether it's system usage, implementation, or H&S Management System development via our Engagement Team and consultants.

Business Continuity

ARM Plus offers an online business continuity management system (BCMS) and consultancy, enabling organisations to develop and implement continuity plans, procedures and arrangements and establish ownership and engagement within their teams.

- Tailored business continuity plans that address specific organisational priorities.
- Complete risk assessments, recovery and response plans with built-in guidance and learning in system modules.
- Gain instant visibility into business continuity plans as they're developed, allowing administrators to track progress, action items and pending approvals.
- Manage an incident in incident mode, enabling real-time coordination, updates, and tracking until the Incident is resolved.
- Access support for system usage, implementation, or business continuity system development instantly from our Engagement Team and consultancy support.

Health & Safety E-Learning

The ARM Plus Health & Safety E-Learning system comes equipped with our standard E-Learning pack, designed to address the principal safety risks businesses face, as well as GDPR (General Data Protection Regulation). Ready to deploy in minutes, your employees can access training wherever they are, whether they have email accounts or not. Customisable training plans and reporting functionality identifies training needs and employee-level risk exposures for effective management.

Health & Safety and Business Continuity Consultancy

We believe risk management should be owned within your business. We can provide consultancy support on a pay-as-you-go-if-you-need-it basis where you need extra bandwidth or specialist expertise. Some of the ways our remote and on-site consultancy is used:-

- H&S audit.
- GAP analysis of risk assessments.
- Development of H&S arrangements and control measures.
- Site inspection programme.
- H&S committee support.
- Business Continuity.
- Supply chain analysis.
- Programme design.
- Incident response plan.

Build your solution

If you have a particular issue or concern when managing risk, then use this free tool to build your solution.

What Clients Say

"Like many businesses, we have limited resources and so the capability of the ARM Plus system to generate bespoke RAMS, quickly and efficiently is a real benefit, reducing the administrative burden on the business."

KEVIN BERRY, HAYLEY 247 ENGINEERING LTD
