Live Date:	Currently Live – 2023 Review
-------------------	------------------------------

Product Type Description: Our Marine Trades insurance is designed to provide organisations, operating in the marine sector, with a comprehensive range of covers within a single policy.

Additional information about the product can be found at:

[Marine - Arch Insurance \(archgroup.com\)](https://www.archgroup.com)

Characteristics and features of the product: Core covers provided include third party legal liability, employers' liability, property damage, all risks to specified items, chilled and frozen foods, business interruption, vessels, defective title, builders risks, goods in transit, money and assault, exhibition risks, loss of licence, personal accident, terrorism and legal expenses.

There are also supplementary covers available which include professional indemnity, management liability and cyber.

Limits of indemnity and excesses are individual to each section of cover.

The general policy exclusions outline that no cover will be provided for damage, liability or expense directly or indirectly caused by chemical, biological, electromagnetic weapon and cyber attack; civil commotion; drugs or alcohol; dual insurance; epidemic/pandemic; fines, penalties and/or damages; government action; radioactive contamination; waiving of rights of recourse; sanction breaches; terrorism, unexplained loss; voluntary parting of possession; war; the Insured's wilful misconduct and damage caused directly or indirectly by wear and tear; inherent vice, latent defect, error or fault in workmanship or manufacture; failure to test electrical circuits; failure to collect and sweep trade waste daily and failure to store highly flammable and combustible liquids appropriately.

Target Market:**Who is this product designed for?**

UK businesses serving the marine industry. Example target businesses include marinas, boatyards, boating clubs, marine contractors and harbours.

Who is this product not designed for?

Businesses not involved in the marine industry or individuals who own a boat for personal use.

Vulnerable Customers:

(Select ALL that apply)

Arch recognises that vulnerability characteristics can present themselves, even in the case of commercial policies. These risks have been factored into our product level reviews. Information regarding expectations over and above this standard likelihood are captured here.

Broker Guidance: You should ensure that you assess the presence of vulnerable customer characteristics and verify the suitability of the product, should they arise.

Did any Vulnerable customer characteristics present themselves as risks during the development of the product?

Health – Conditions that affect ability to carry out day-to-day tasks

Life events – Such as bereavement, job loss or relationship breakdown

Resilience – Low ability to withstand financial or emotional shocks

Capability – Low knowledge of financial matters or low confidence

None of the Above

Summary of Product Testing:

Arch has in place various processes to test products:

- prior to bringing to the market;
- where there is a significant adaptation of the product;
- when the target market changes significantly;
- When MI indicates that further testing is warranted.

Over its lifetime, testing will look into whether a product meets the identified needs, objectives and characteristics of the target market. Testing is carried out in both a qualitative and quantitative manner. This may include - but is not limited to - areas such as examination of complaints, claims volumes and frequencies, claim declinatures, remuneration arrangements, policy cancellations, retention rates, loss ratio analysis and external analysis/benchmarking against existing products. Policy wordings, summaries, IPIDs and other customer communication documents are reviewed as part of this process.

The presence of vulnerable customer characteristics will be reviewed at Product Development stage and throughout the ongoing Product Review Process.

This is a long-standing product in the market that has a proven track record of providing coverage for the specific requirements of its target market. The distribution channel is believed to be appropriate, and remuneration levels reasonable and in line with market standards.

Product Review Process:

Arch maintains a stringent Product Review Process, full details of which are contained in our Product Oversight and Governance Policy. The Process is in line with FCA PROD and Consumer Duty requirements and is conducted at least annually, or more frequently when considered necessary.

This product is next due for review through Arch's Product Review Process in 2024, unless there is a significant change to the product or MI indicates an earlier review is necessary.

Risks and Cost:

The **risks** and **costs** have been reviewed through Arch's Product Review process, as part of product development. Due to the number of risks written under any given product, average premiums have been used to assess value – with averages allocated to differing levels of cover or limits where appropriate.

You should ensure that, in assessing the suitability of the product, you identify the risks posed to the insured, and that all costs associated are appropriate to their needs, including any additional fees you may add to the premium paid or additional products offered alongside Arch's core offering. Where Arch has been made aware of add-ons, or additional fees, these have featured in our value assessments.

Product Value:

Product Value is the relationship between the overall price to the customer and the quality of the product(s) and or services provided. Arch considers this product provides fair value to customers in the target market. We have reached this conclusion after consideration of the price, benefits and features, available MI and the distribution chain involved (this is a non-exhaustive list). You should be satisfied that, in offering this product, it meets fair value expectations.

Conflicts of Interest:

Arch has identified no conflicts of interest in the manufacture, underwriting and distribution of this product. Should you become aware of any information that leads you to believe a conflict of interest may be present, please contact Arch without delay.

Arch Product Oversight and Governance Arrangements

Following the implementation of the Insurance Distribution Directive [‘IDD’] on 1st October 2018, the Pricing Practices changes from 1st October 2021 and 1st January 2022 and Consumer Duty requirements as at 31st July 2023, this document outlines Arch’s approach to Product Oversight and Governance to demonstrate the way we design, monitor, review and distribute our insurance products.

Why are we telling you this?

As part of the regulatory framework Arch adheres to, we are informing you of the product governance arrangements we have in place for designing, monitoring, reviewing, and distributing this product. The key areas outlined cover the various processes we have in place to monitor our products as well as the information we may require from brokers/coverholders (distributors) throughout the lifecycle of a product.

Product Development Process

The product development process has been designed to ensure that we have a consistent approach to the development of new products, or significant revisions to existing products.

Product Review Process

The product review process ensures that those already within the market continue to be designed in a way that meets the needs of the target market and offers fair value to customers.

Information for distribution partners

As we carry out these reviews, we may request information from distributors to be able to evidence that our products are being distributed correctly - examples of this could be evidence that the product has been sold to the right target market or complaints received relating to the product. In most instances we will hold this data already on our systems, but there will be occasions when we may request it from relevant distributors. We will endeavour to provide adequate notice where we seek this information from you.

Further Information

If you have any questions, please contact your Arch representative.
