Department	IT – Enterprise Reporting	Duration	Monday 22 nd June 2026 – Friday 14 th August 2026

About Arch Insurance International

- Arch Insurance International, part of the Arch Capital Group, is a market-leading insurer located in the UK. We provide a range of property, casualty, and specialty insurance for corporations, professional firms, and financial institutions across the UK, Europe and Internationally, with a significant presence in the Lloyd's and London Underwriting market.
- Arch Insurance recognises the need to be a digital insurer and as such has shifted focus from traditional technology initiatives to agile driven digital initiatives, leading the commercial & specialty insurance space. Arch offers an entrepreneurial work environment that empowers the individual and encourages constant learning and growth.
- People are at the centre of everything we do at Arch, and we are passionate about investing in the future talent of the insurance industry and providing early career paths where everyone can thrive. Our range of UK early careers programmes include summer internships, commercial insurance apprenticeships and graduate programmes.

Summer Internship Programme

During your 8-week internship as a Reporting Engineer, you will collaborate with the Digital Product Managers (DPM), business system owners, members of the team, and users to capture business requirements and work with the team to accurately translate them into reporting solutions in a fluid, iterative and agile manner.

You will develop skills to be proficient with the use of reporting techniques and skills to deliver functionality in the shape of extracts, reports, dashboards and other solutions fit for purpose.

The internship will involve detailed data analysis to support the provision of data to and from the new & existing shared service systems, building a strong understanding of enterprise data flows and data engineering technologies and practices.

Key Tasks & Responsibilities

- Liaising with 3rd party suppliers and implementation partners to support the timely completion of All deliverables for any existing projects and provide local oversight of Corporate-level deliverables.
- Building close working relationships with business stakeholders, ensuring they are kept up to date and involved.
- Learning and maintaining knowledge of the reporting suite across Data Domain.
- Conducting detailed data analysis in collaboration with upstream product teams to define data requirements for reporting systems and ensure dependencies on other product teams can be resolved within required timeframes.
- Working with QA colleagues to support the robust testing of system changes.
- Deliver data driven insights and actions through Dashboard and Reports built in tools from our reporting toolset, focusing on Power BI. Build to a high standard to ensure quality and consistency to the business
- Conducting system prototype demonstrations to validate requirements with stakeholders.

Qualifications & Experience

- Expected/achieved minimum 2:1 classification in any IT-related degree discipline

Arch seeks candidates who have excelled in previous work experience, demonstrated outstanding academic and extracurricular achievement, possess strong analytical, quantitative, and interpersonal skills, and are enthusiastic about the insurance industry.
